13     <p>The word strawberry is coined from 'strew' berries about the plants and
14       thus the "strewn berry" finally turned into "Strawberry" (Roger). They are
15       not actual fruits or berries but distended ends of the stamen of the plant.
16       the seeds are on the external surface, rather than the internal berry. There
17       are around 200 seeds for each berry. They are low in calories and are
18       non-fat, loaded with vitamin c, folic acid, fiber, vitamin B6 and potassium
19       (Roger).
20     </p>
21     <p>Over the years they have been utilized as medications for ailments like,
22       stained teeth, sunburns, gout and digestion (Hopley, 9). Strawberries
23       were served up at medieval state occasions as a show of peace, wealth,
24       and exellece. The most well-known communal intake of strawberries is at
25       Wimbledon annually, when strawberries and cream are eaten by very
26       well attired Englishmen in the middle of tennis games (Hopley, 9).
